

Remote power measurement and trouble shooting with the Fluke 434 and 435

With a telemetry set it is from now on possible to arrange complete remote measurement thru GPRS/UMTS/HSPDA. Install your analyser at the customer site with this set. And you will have full control over your Fluke 434/435 analyser from your laptop over the internet.

(or any other equipment with RS232 interface)

Your benefits are:

- Saving many hours of driving to the customer.
- Full remote control of the power analyser with Flukeview
- Instantaneous reading, analysing data.
- Download data and analyse the data on your laptop/PC.
- Send new settings to the analyser and start a new measurement.
- Get faster information from your customer.

The set contains:

Sierrawireless Raven XE modem Comportserver
Special modemcable
Communicationsoftware.
Flukeview and power with special com settings
Manual with setup instructions.

Special requirement on the simcard Fixed IP adres.

Total set price ex. Btw € 1255,00
